

*"OstermanCron was extremely accommodating. They listened and worked with us to find the furniture, fabric, and finishes that met our tastes and requirements. Even working under a tight deadline, it was clear that OstermanCron's first priority was to ensure we would be happy with our selections."*

#### Objective:

Beckfield College was moving to a new location in Florence, KY and wanted to upgrade its image to attract students.

Lisa Beck, who was responsible for furniture selection, wanted to create a comfortable, welcoming environment without being intimidating.

#### Project:

The new location would house the college and the corporate offices. OstermanCron furnished the library, private offices, two lobbies and an executive area.

#### Products:

National Envy, Prefera, Barrington and Pennant.

#### Why the furniture worked:

The client was able to select fabrics and finishes across product lines to create a cohesive and upscale look, within their budget. Even on an extremely tight deadline, Kimball's Quickship program delivered on time, and the lifetime warranty on National and Kimball Office furniture gave the client the assurance that their furniture would endure.

#### Why OstermanCron?

OstermanCron's diverse product offering and competitive pricing were important in creating a cost effective package.

#### Services:

OstermanCron provided space layout and Wessels Workplace Services installed the project. Paul Hemmer Companies did the build-out of building.

#### Design: OstermanCron
