Objective: Dialysis Clinics, Inc. was opening a new office in West Chester, OH and needed to completely furnish the new location -- with an upscale image on a budget.

Project: Six offices, one conference room, one break room and a waiting area.

Products: Sauder for waiting area and National's Gotcha, Triumph, Cinch and Clever.

Why the furniture worked:

Strength, durability and comfort. The waiting room furniture does not look like typical institutional or medical facility furniture yet the upholstery is durable and easy to clean. In the offices, furniture gives the space a finished, professional, cohesive look.

Why OstermanCron?

OstermanCron provided the right combination of product selection and pricing options.

Services: OstermanCron provided design services and Wessels Workplace Services installed the project.

Design: OstermanCron
