

"OstermanCron made the furniture portion of the project easy. Their hands-on approach, attentive sales team and courteous installers were a pleasure to work with. Becky van Leur's personal attention and ability to adjust ship dates and installation times enables St. Luke Pediatrics to see patients immediately after the physicians moved into their new space."

St. Luke West – Pediatric Center

Healthcare

Visit the St. Luke West Project Gallery at www.ostermancron.com to view larger photos

Objective: St. Luke West was adding a new pediatric center and wanted to create a bright, fun -- yet durable -- environment that would appeal to its young patients.

Project: Provide furnishings for the waiting area, four nurse's stations, and 11 exam rooms.

Products: Keilhauer chairs, National Gotcha chairs and Softcare seating. The Softcare Seating fit perfectly into the scheme. The smaller scale suited the narrow waiting room and the heavy duty construction is a must in a busy hospital practice.

Design: Roth Partnership, Inc. focused on designing a non-institutional feeling for St. Luke Pediatrics. They created a stylized ocean theme that is fun and cheerful.
